9. Image segmentation

- (a). Develop a program to implement the Roberts, Prewitt, Sobel, the Marr-Hildreth and the Canny edge detectors. Use the image 'building.tif' to test your detectors. (For technique details of Marr-Hildreth and Canny, please refer to pp.736-747 (3rd edition, Gonzalez DIP, or pp.705-725 for the electronic textbook) or MH-Canny.pdf at the same address of the slides.)
- (b). Develop a program to implement the <u>Otsu's method</u> of thresholding segmentation, and compare the results with the <u>global thresholding method</u> using test image 'polymersomes.tif. (For technique details, please refer to pp.763-770 (3rd edition, Gonzalez DIP, or pp.742-747 for the electronic textbook, or Otsu.pdf at the same ftp address of slides.)
